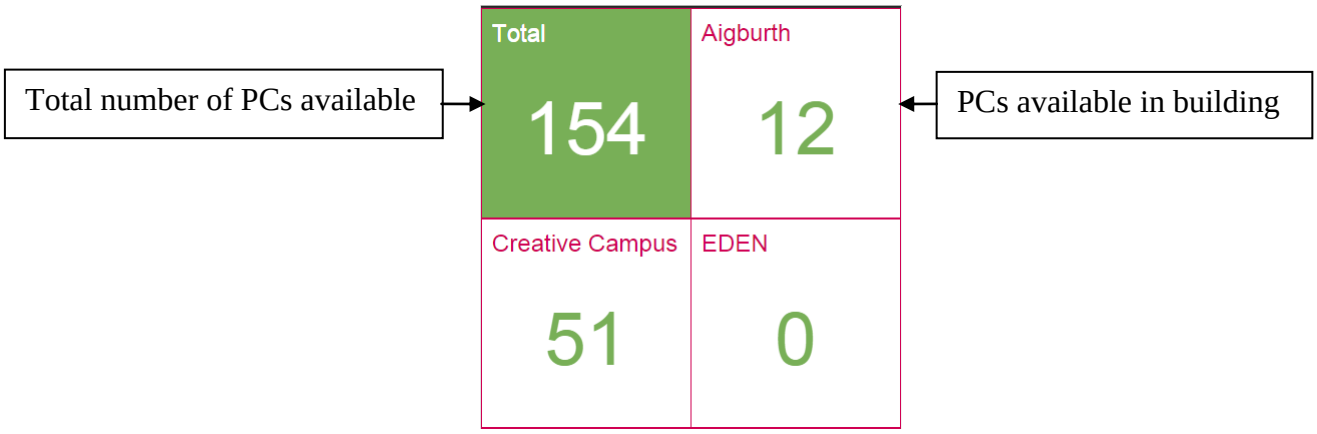
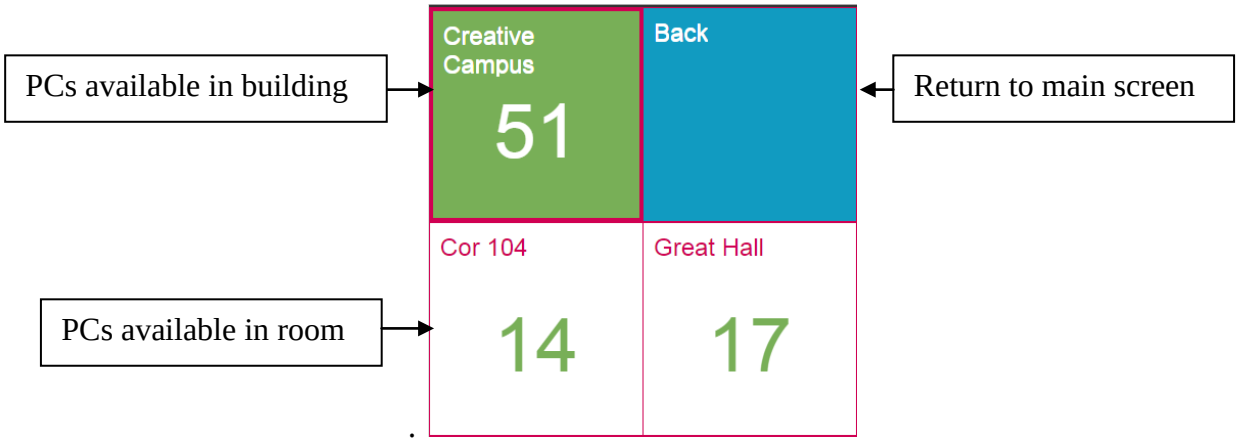
PC Finder allows you to locate available PCs across the university (Hope Park, Creative Campus and Aigburth Halls of Residence).

When the application opens, squares are displayed which represent the buildings in the university. The number in the middle of the square shows the total number of PCs available in the building.



Clicking on one of the buildings will trigger an animation which will show the individual rooms for a building and the number of PCs available for each room



Clicking on a room will then drill down a further step, showing a map of the room and the PCs within that room. **Free PCs are shown by a green tick.**
